Handrails

A handrail is mandatory according to EN81-41. The height between platform floor and top edge of the handrail is between 875 - 925 mm. Minimum cross-sectional dimension is 30 mm. Standard Cabin: Black [G-side only] or Stainless Steel*

* Adding option will be at extra charge

Control Operation Panel (COP)

The control panel is always placed on the machine side (G-side) of the cabin. It contains the destination buttons, the alarm button, the open-door button and a color display. As an option it can be configured with an auto dialer system and/or a key. It has a backlight all around the profile which emphasizes the design of the panel.

Standard Cabin Ceiling

Standard Ceiling is made up of Three LED spots, same finish as cabin walls and optional ventilation fan.

Ceiling:

- ◆ Three LED spots
- ◆ Same finish as cabin walls
- ◆ Optional ventilation Fan*
