## About us

### **STREAMLINE** SOLUTION TAILOR MADE FOR EVERY NEED

We are providing wide range of innovative products including elevators, escalators ,travelators.

### **Residential Building**

Providing quiet living environment with low noise, space-saving designand low energy consumption and reducing equipment operation cost.

### **Business Building**

Provide the most suitable elevators, escalators and sidewalks for all types of office buildings. For open office buildings, effective passenger flow management can also be provided, which can be controlled by the IC card system.

### **Hotel**

The spacious elevator car design allows guests to carry their luggage or let the hotel staff carry their work equipment in and out, and enjoy the comfort of riding and minimizes waiting/traveling time.

### **Shopping Centre**

We provide complete elevators, escalators and sidewalk solutions to ensure safe, smooth and comfortable transport of passengers based on the environment, allowing customers to enjoy shopping.

### **Public Transportation and Airport**

Provide comprehensive products to solve the all-weather passenger flow challenge faced by public transportation centres or airports, and ensure unimpeded traffic to passengers.

### **Medical Facilities**

Elevators and escalators are available for heavy-duty medical facilities, and provide elevators with easily to accommodate stretchers, hospital beds and other medical equipment.

**FEATURES OF  
OUR ELEVATOR  
ENERGY EFFICIENT &  
COST-EFFECTIVE**

STREAMLINE strives to make energy efficient and environmentally conscious products so that we can do our bit to help the state of Earth to improve and conserve as much energy we can which at the end helps our users and ultimately our world.

## COMFORT

STREAMLINE is adamant on making elevator travel as comfortable it can be for our passengers and make them enjoy the ride.

### Reduced Noise

STREAMLINE has tried to ensure that the passenger is travelling in utmost comfort by making a elevator so silent that you can ride in with mental peace.the ride

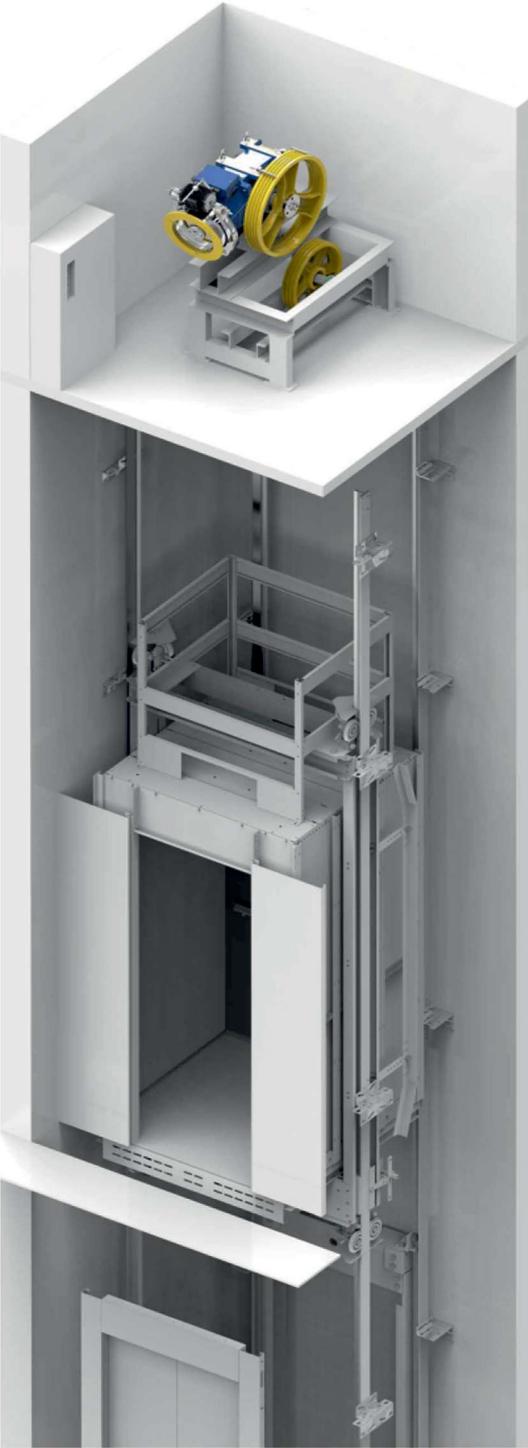

### Integrated Drive Technology

Integrated Drive in STREAMLINE ensures that the Elevator accelerates or decelerates in a smooth S curve to provide smooth and comfortable ride to the passenger.

## **RELIABILITY**

At STREAMLINE our utmost priority is to make the elevator travel as safe as possible. We have put in all the features that can make your travel safe and sound.

## MACHINE ROOM ELEVATOR

### ENERGY EFFICIENT & COST EFFECTIVE

#### Door Opening

STREAMLINE gives you a premium quality of Auto or Manual doors .Center opening door which opens from the middle and another is telescopic one which opens from the side, as per your need.

#### Smooth Riding

STREAMLINE is renowned for the ride quality that we provide to our customers. We put comfort at one of our utmost priorities.

#### Modern integrated controller

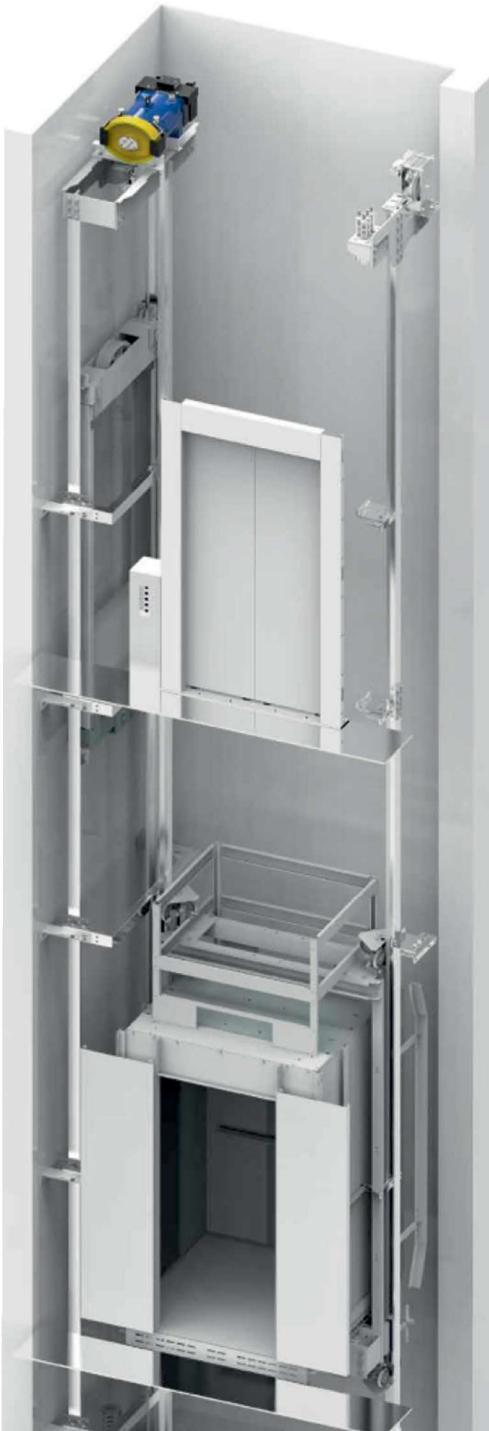

We provide you with the latest and innovative controller in the market Our controller is loaded with features so that your elevator rides smooth and safe.

#### One-Directional safety gear

We at STREAMLINE have safety as our number one priority that's why our elevators are installed with the special One-Directional safety gears to keep you and your loved one always safe and secure.

#### Ease of installation

We have made our Elevators such that its easy to install for our expert technician and will be done in a minimum amount of time.

## MACHINE ROOM LESS GEAR-LESS ELEVATOR

### ADVANTAGES

STREAMLINE equipped with regenerative technology. Regenerative technology, uses up to less energy than a conventional geared 75% elevator. while producing power with lower harmonic distortion, minimising the impact on the building's electrical system and giving back power to the main grid.

### Space Savings

Our Elevator is made for space saving. The elimination of machine room saves lot of space and the construction cost and moreover our package needs minimal hoist way overhead.

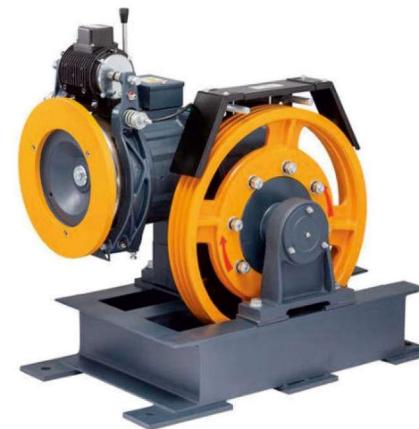

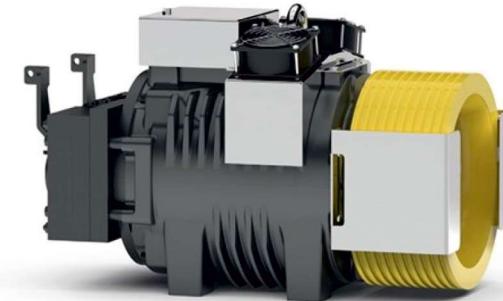

### Simple & Cost effective Installation

Our elevators are installed in a very quick and cost-effective manner. Our Process of installing the machine is simplified to an extent that it makes the installing a very less consuming task.

### Thermistor Technology

Our elevators are equipped with thermistor technology in which temperature relays can be used to monitor the temperature of the motor (by built-in thermistor) and shut down if the temperature exceeds a set-point.

Sicor and Montanari Guilli from Italy for our elevators these units saves space, reduce load on infrastructure, consumes less electricity, work more efficiently with ease of installation and maintenance.

# CONTROLLER

## ADVANTAGES

- Excellent travel comfort thanks to direct landing
- Shorter travel time in comparison to standard
- VVVF systems
- Energy Saving modes
- Full Synchronization
- Compact modular design
- Simple and fast installation Easy update
